NEWS

ORNL partners with Volkswagen to create innovation hub

Oak Ridge National Laboratory (ORNL) announced on January 17 a partnership with Volkswagen Group of America and the University of Tennessee, Knoxville, to create the automobile manufacturer's first innovation hub in North America. [Read More.](#)

NETL project brings T2 to the beach in Hawaii

The National Energy Technology Laboratory (NETL) has partnered with Oceanit Laboratories to develop a coating called HeatX, which improves the efficiency of a power plant's condensers and helps keep the plant running longer between maintenance shutdowns. [Read more.](#)

[Army-funded material could help trace mechanical failures](#)

Duke University research funded by the Army Research Office has developed a new polymer material that allows for time-stamping of a mechanical shock. The resulting ability to pinpoint the particular event that led to a mechanical failure has potential applications in areas such as medical devices or remotely operated drones. [Read the Abstract.](#)
